# "Finer Than Fine" Velcro-Poster (Version 1.0)

This is a velcro-poster designed for progressively introducing new vocabulary terms over the space of multiple lessons. Each term is a potential response to the question "How are you?" in the format of "I'm [ ]". Or "I'm feeling [ ]." The responses "good" and "great" are included instead of "well" and "very well" as personally I feel they are in more common use, even in the form of "I'm good/great.", despite being technically incorrect. Similar goes for "awesome".

Weaselling responses such as "so-so" and "sleepy" however were *intentionally omitted*.

This document is split into three sections:

1. Blank Poster (pp 1-9)
2. Stick-on Cards (pp 10-15)
3. Help Document (pp 16-17)

A finished poster using this template will come out a little larger than A2 in size. There are four more stick-on cards than spaces to allow you to pick and choose.

This template requires:

A4 colour printer

A4 laminator

22 small squares of male velcro

18 small squares of female velcro

Additional male velcro for the back in case you wish to attach it to a carpeted wall (South Korean schools are rather fond of these)

Tape

Steel rule

Stanley knife

## Directions

1. First, print off the panels of the **blank poster**.
2. Arrange the panels of the **blank poster**. Trim the outer edges of the 8 edge panels. Doing so before laminating will prevent peeling along the edges.
3. Laminate the panels of the **blank poster**.
4. Now, carefully arrange the **laminated panels** and trim them to fit, taping them together as you go. It is recommended you work from top to bottom first in columns. For example, take the top left and middle left panel. Now, trim the lower edge of the top left panel only. Once trimmed, line this up carefully with the middle left panel and temporarily tape them together. Now, run the knife over this seam once more such that the two panels are cut in precisely the same place. If done correctly, any mistakes you make whilst cutting will ultimately form a jigsaw fit. Now, tape the pair of panels together. Do the same with the middle left and lower left. Repeat with the other two columns, and then connect the three columns in much the same way.
5. Print off the **stick-on cards**.
6. Trim each of the individual **stick-on cards**. Doing so before laminating will prevent peeling along the edges.
7. Laminate the individual **stick-on cards**.
8. Trim the **laminated cards**.
9. To the upper back of each laminated card, attach a **piece of male velcro**. In an equivalent spot on the Poster, stick a **piece of female velcro**. You will probably need to do two corners for the central "fine (thank you)" panel.
10. Finally, stick any extra **spare male velcro** on the rear of the poster if you have carpeted walls. It is recommended that you place these over the joints to strengthen them.

Example
